

Press Release – FOR IMMEDIATE RELEASE

MedTorque Expands Operations with New Location *Successful relocation of headquarters and expansion of manufacturing capacity completed*

April 7th, 2017

Elmhurst, IL – MedTorque, Inc., a leading supplier to orthopedic and spine OEMs, has successfully completed the relocation of its corporate headquarters and Chicago manufacturing facility to its new location in Elmhurst, IL. This new location, with 38,000 square feet of space, will accommodate the corporate offices and manufacturing operations previously located in separate Chicago area locations.

“MedTorque’s commitment to its customers is exemplified through this investment in expanding and upgrading to a more modern facility that can handle the growing demands of our customers,” commented MedTorque CEO, Steve Sundberg. “Not only does it demonstrate to our customers the willingness of MedTorque to invest in exceptional service and capabilities, it also speaks to our operational execution. We were able to complete the move, including all validations, without any disruption to our customers.”

The address of the new location is:
612 Lamont Rd
Elmhurst, IL 60126

MedTorque also operates a facility in Kenosha, WI, where it designs and manufactures its silicone handle product line of fixed, ratcheting, and torque-limiting products. It is also well known for the manufacture of other complex instruments for orthopedic and spinal surgeries.

About MedTorque, Inc.

MedTorque is a technology-based precision machining company. MedTorque designs, manufactures and markets customized, highly-engineered component parts, instruments and complex assemblies that require the highest levels of tolerance for the world's leading medical device OEM's.
