

CNC SWISS LATHE OPERATOR (2nd Shift)

MedTorque, a leader in machining of medical devices products, is currently searching for an experienced CNC Operator for our Elmhurst, IL operations. Qualifications include knowledge of precise tolerance machining of stainless steel, aluminum and titanium. 3-5 years' experience on Swiss CNC lathes. Past experience in the medical field and being a self-motivator is a plus. Must be able to work independently. Applicants should know and understand ISO requirements.

Applicants must be legally eligible to work in the USA and must pass a pre-employment drug screening. MedTorque, Inc. is a strong and upcoming manufacturing company that has expected growth and offers a clean and pleasant environment. This is a direct hire position. MedTorque offers a competitive wage and benefits package. MedTorque is an equal opportunity employer.
