

Press Release – FOR IMMEDIATE RELEASE

MedTorque, Inc. Obtains CE Mark Approval for Torque-Limiting Products *Product line adds to growing list of MedTorque products approved for distribution in Europe.*

August 23, 2017

Elmhurst, IL – MedTorque, Inc., a leading supplier to orthopedic and spine OEMs for standard and custom instrumentation, announced today the CE Mark approval of their axial torque-limiting drivers. This approval adds to the portfolio of MedTorque products that carry the CE Mark. The TRI-GEAR™ line of ratchets received approval in December 2015.

“The latest CE Mark approval for our torque-limiting drivers demonstrates not only our commitment to provide our customers a differentiated product but our commitment to regulatory excellence,” stated MedTorque President and CEO, Steve Sundberg. “This recent addition puts MedTorque’s products in a class of their own.”

MedTorque’s torque-limiting product is available in various torque values and can be configured with any one of the numerous standard quick couplings offered or with a custom drive end.

About MedTorque, Inc.

MedTorque is a world class manufacturer of orthopedic instruments and implants with locations in Wisconsin and Illinois. We design, engineer and manufacture our own line of orthopedic instruments as well as our customers’ highly complex products. Our customer partnerships drive innovation and product launch success.
